

There's a better way

inSinkerator®

Life isn't slowing down, it's getting faster. Australians are desperate for solutions that save them time, especially in the kitchen.

InSinkErator Food Waste Disposers offer a quick and easy way to dispose of food waste and represent a modern lifestyle solution. Food scraps are conveniently deposited down the sink, ground without the use of blades into fine particles and flushed safely into the sewerage system.

Hygienic

They eliminate the need to transfer food waste from the point of preparation to an alternate area to dispose of.

Convenient

The ability to quickly and simply flush waste down the kitchen sink significantly reduces meal preparation and clean up times.

Innovative

InSinkErator Food Waste Disposers grind without the use of blades and are now extremely quiet.

Smart

The kitchen is the hub of the family home and new technology that improves our lifestyle, in the most important area of the house, is the future of modern living.

Responsible

They can help reduce greenhouse gas emissions and at capable wastewater treatment plants, recycle food waste to produce renewable energy.

Don't live with food waste, install an InSinkErator Food Waste Disposer today.
